Gary, it would be good to have a brief conversation. Please call when you have a chance (202-564-3151). If we don't connect when you call, just give me a couple times when you will be available, along with your phone number.

Fred,

Thanks. This is useful.

I think that I now have everything that I need to draft the response to the Inhoff letter.

Yesterday, I was assigned the other letter from the Congressmen, so now I can work on both.

Is there any need to have a discussion by phone about the second letter? Have we had any similar letters from these Congressmen in the past?

Gary

 Subject: Talking Points, Re: Latest Version of FR Notice

Hello,

Below are a set of talking points to use for your heads up discussions on the extension of the Pavillion comment period.

Mary

- On Friday, EPA expects to publish a notice extending the public comment period for the Agency's draft research report on the investigation of ground water contamination near Pavillion, Wyoming.

- The comment period will be extended for 8 months to September 30, 2013.

- EPA and USGS recently released the results of further sampling of the Pavillion deep monitoring wells. These new data have spurred questions about the latest round of sampling as well as the procedures used for earlier monitoring phases.

The extension provides an opportunity for EPA to add additional information to the docket which addresses these questions and to meet with stakeholders to gain a better understanding of the issues that have been raised.

- EPA will be posting additional technical information including:
  - o Further details on how the study was conducted,
  - o Recent information from Phase V sampling, and
  - o Responses to issues that have been commonly raised by stakeholders.

- EPA is actively reviewing all of its Pavillion data with an open mind and, in light of the newly posted information, further stakeholder inputs, and public comment, will examine a number of options going forward.
